

X8 MIG Welder

Extreme industrial welding redefined

Take the next step of connectivity

The time has come to unleash the enormous potential of IoT, the power of connectivity. With new technology, Kemppi will redefine performance, usability and welding management in demanding industrial MIG/MAG welding – it's time for X8 MIG Welder.

EXTREME PERFORMANCE

EXTREME USABILITY

EXTREME WELDING MANAGEMENT

Industrial multi-process welding redefined

Redefine performance

- Best arc characteristics for high speed welding (WiseFusion), narrow gap welding (RGT), pipe root welding (WiseRoot+) and low spatter welding in the globular transfer area (WiseSteel)
- Precisely controlled, upgradeable welding current up to 600 A
- Advanced MIG brazing, cladding and heavy-duty gouging performance

Redefine usability

- Fast and easy to change system and welding settings, to adjust and to control welding values, and view WPS content
- Well-balanced welding guns with ergonomic handle design
- Wire feeder with ultimate user-friendliness

Redefine welding management

- Smart Digital WPS feature, which renders printed WPSs unnecessary
- Automatic setting of welding parameters based on the WPS
- Fully compatible with the WeldEye welding management software
