

Insight Creates Value

# WeldEye — Insight Creates Value

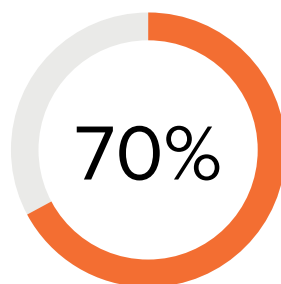

WeldEye is a universal software solution to manage welding production. A balanced combination of software, hardware and service, WeldEye creates value through insight into WPS compliant welding quality, personnel qualifications, and much more. It reduces overhead costs by simplifying your documentation process and reducing repair rate. The software is available globally and compatible with any brand's welding equipment. As a cloud service it provides a simple way to control your welding production anywhere in the world, regardless of your location.

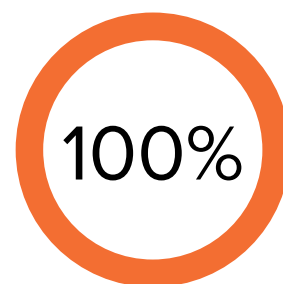

**VIEW OF YOUR  
WELDING  
PRODUCTION**

**REDUCED  
REPAIR  
RATES**

**FASTER  
DOCUMENTATION  
PROCESS**

**TRACEABLE  
WPS  
COMPLIANCE**

## WeldEye sales packages

WeldEye's modular structure is based on various useful functions that serve the needs of wide-ranging industries and welding-related tasks. The WeldEye modules are combined into software solutions that answer to the needs of your welding production.

### WELDEYE FOR WELDING PRODUCTION ANALYSIS

- Tracking of arc-on time
- Timeline graphs grouped by welding station, work shifts or projects
- Monitoring of welding parameters

### WELDEYE FOR WELDING PROCEDURE AND QUALIFICATION MANAGEMENT

- Easy management of WPS, WPQR and pWPS documents
- Efficient management of welder, operator and inspection personnel's qualification certificates

### WELDEYE FOR WELDING QUALITY MANAGEMENT

- 100% traceability for each weld
- Heat input verification
- WPS compliance verification
